## About

Before delving into my skills, allow me to share a brief and intriguing backstory about myself. I am a highly motivated and disciplined individual who possesses a genuine passion for learning. When I encounter something that captures my interest, I am driven to delve deep and acquire comprehensive knowledge. This is not a mere sales pitch; it genuinely defines who I am.

Currently, my fervor is dedicated to two consistent daily pursuits: coding and working out. I commit myself wholeheartedly to these activities, and my GitHub profile serves as a testament to my coding dedication. Each screen dot in the screenshot represents a day, with green indicating that I have contributed code on GitHub.
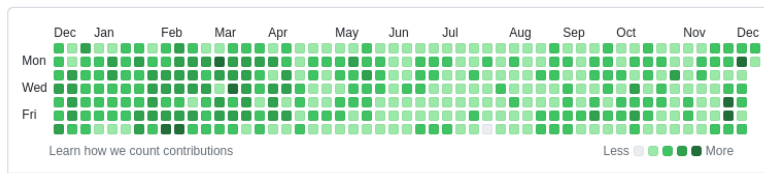

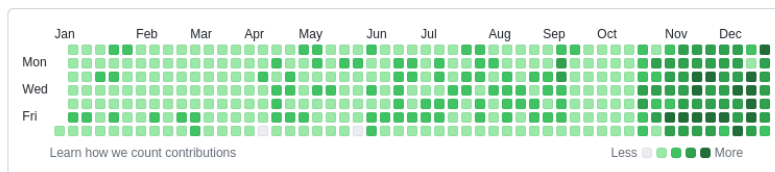

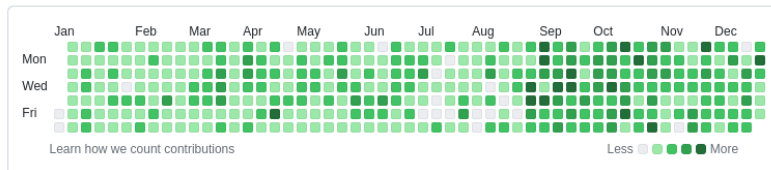

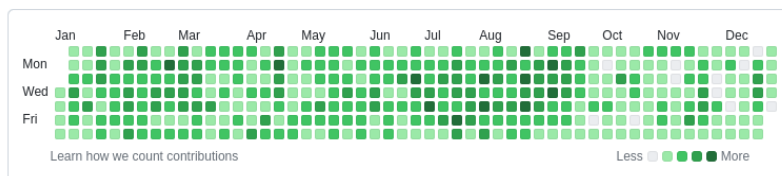

## Skills

My expertise lies in full-stack development, and I have a proven track record of building multiple web applications throughout my coding career. These projects span a spectrum of backend technologies, from **Firebase** to **MySQL Laravel** backend. In the course of these endeavors, I have seamlessly integrated various **APIs**, incorporating functionalities such as **SMS** with **Twilio**, **payment processing** with **Stripe** and **Mollie**, **email** services with **SendGrid**, and leveraging the **Google Geolocation API** for precise **location calculations**, among others.

Recognizing that technical prowess alone doesn't define a great developer, I've dedicated significant effort to honing my **soft skills** and **communication** abilities. As a professional developer, I understand the **importance** of **effective communication** in creating successful projects.

While I've ordered my skills from most proficient to less, it's crucial to note that I am adept at utilizing each mentioned skill effectively. My proficiency in both technical and soft skills underscores my commitment to delivering well-rounded and impactful contributions to any development project.

**Coding Skills**

- Vue
- React/Nextjs
- Laravel
- Nodejs
- Firebase
- SQL
- PHP
- MongoDB

**Tooling**

- Wordpress
- Plesk
- Godaddy for hosting

**CI/CD**

- Github

## Experience

2017 - 2020

**Drone consultancy, Hilversum** – *Fullstack developer*

- Build backend infrastructure with all the **Google Suit** and **Firebase** capabilities

- Build the whole frontend with **Vue.js**
- Did **CI/CD** with **Github**
- DevOps / Hosting / Keeping track of logs with the Google Suit

2020 - 2021

**Company Name, Location** – *Fronted Developer*

- Build frontend projects with **Vue** at Smit.net which is an website agency
- Worked in teams with **Laravel** backenders
- Learned the value of communication skills
- Did **CI/CD** with **Github** and worked in branches inside a team
- Learned some **Laravel** backend skills

2021 - 2023

**Codeerschool, Amsterdam** – *Fullstack (Laravel Inertia and Laravel Nova)*

- Build on a big in-house Laravel project using Laravel Nova (which uses Laravel Inertia)
  - This project has customers within the 500 000 and up
  - Has data tables with size up to 6 000 000
  - Project makes 10 000 euros a day on a average
- Frontend with Vue (these are primarily for custom frontend components)
- Worked with **Mollie** Payment api with Laravel for payments
- Worked with **Twilio** api with Laravel to send Sms
- Worked with **Sengrid** api with Laravel to send Email
- Worked with **Postbode** api with Laravel to send Letters
- Used SQL extensively to perform queries on the database

# Education

2014 - 2019

**Hogeschool Van Amsterdam, Amsterdam** – *Bachelor Degree in Communication Multimedia Design*

Having successfully completed the rigorous Communication and Multimedia Design program at HvA, I bring a robust skill set that seamlessly blends design proficiency with coding expertise. Throughout the program, I engaged in real-world projects, refining my abilities in visual aesthetics, interaction design, and the practical application of various multimedia technologies. My commitment to both the creative and technical aspects of the field is evident in my 20-week internship and self-directed graduation project, where I demonstrated a comprehensive understanding of the design process.
